PROFESSIONAL SUMMARY

Data Engineer with analytics engineering experience designing metrics, building scalable data pipelines, and developing dashboards. Skilled in SQL, Python, ETL, and data modeling, with a track record of partnering with cross-functional teams to deliver reliable, business-ready analytics solutions.

SKILLS

Languages & Query: SQL, Python, DAX, PowerOn, Excel
Data Engineering: ETL/ELT, Data Pipelines, Incremental Loads (MERGE/Upsert), Data Warehousing, Data Modeling (Star Schema), Data Validation, Metrics Design
Platforms & Tools: SQL Server, Symitar/Episys, Power BI, Tableau, SSRS/Report Builder, Power Automate, SharePoint, OpCon, bcp, HubSpot, REST APIs
AI & Automation: AI-Assisted Development, Prompt Engineering

EXPERIENCE

Data Engineer July 2024 – Present
McCoy Federal Credit Union *Orlando, FL*

- Build and maintain daily outbound file feeds to HubSpot, writing SQL extracts against the Symitar/Episys data warehouse and automating delivery through bcp and OpCon scheduling.
- Designed and maintained scalable ETL pipelines in SQL Server, integrating operational systems into a centralized data warehouse.
- Designed data pipelines and KPI frameworks used by finance and operations leaders to guide product and retention strategy.
- Built Power BI dashboards for call center queue performance and member attrition across accounts, shares, and loans, refactoring legacy SQL reports into reusable datasets.
- Automated economic indicator alerting with Power Automate, Power BI, and SharePoint.
- Deliver SQL and SSRS reports for Fraud, Card Services, Lending, and Operations, including daily negative balance monitoring, certificate rate changes, and debit card limit tracking.
- Optimized complex SQL queries and reporting datasets, reducing dashboard refresh times by 35%.

Data Services Specialist I December 2022 – July 2024
ADP *Maitland, FL*

- Analyzed complex client datasets and developed ETL roadmaps for payroll and HR system integrations.
- Ensured data quality through validation routines, transformation logic, and reconciliation checks.
- Collaborated with implementation teams to redesign file formats and reporting structures, reducing onboarding time by 15%.
- Improved reliability of conversion pipelines by standardizing templates and documentation used across teams.

Founder and Data Analytics January 2020 – March 2022
Jackson Logistics Group LLC *Altamonte Springs, FL*

- Built and maintained ETL/ELT pipelines supporting hybrid cloud architecture across SQL Server and Azure.
- Migrated on-premises SQL databases to Azure SQL using Azure Data Factory, improving scalability and performance.
- Designed Power BI dashboards for real-time logistics metrics including carrier KPIs and transportation spend.
- Automated SQL-driven workflows to reduce manual data entry and improve data accuracy across operations.

Senior Resource Management Analyst September 2019 – June 2020
Verizon *Lake Mary, FL*

- Designed Tableau dashboards to track KPIs, workforce utilization, and performance across teams.
- Leveraged SQL and Excel for ad-hoc analysis supporting staffing forecasts, increasing forecast accuracy by 12%.
- Partnered with operations managers to implement data pipelines, resulting in a 10% increase in operational efficiency.
- Developed forecasting models for staffing needs and analyzed workforce utilization trends.

Payroll Administrator February 2016 – September 2019
Verizon *Lake Mary, FL*

- Analyzed payroll variances and employee claims to identify and resolve discrepancies, keeping financial records balanced.
- Built and maintained Excel spreadsheets for leave calculations, and validated timekeeping data before payroll submission.

EDUCATION

Strayer University Maitland, FL
Master of Science, Information Systems.

University of Central Florida Orlando, FL
Bachelor of Science, Business Management.
